Nagesh Gavhane

SENIOR BACKEND ENGINEER · PYTHON · FASTAPI · PHP

Pune, Maharashtra, India · +91 96893 49752 · gavhanenagesh29@gmail.com · linkedin.com/in/nagesh-gavhane · github.com/Nagesh2911

Backend engineer with **10+ years** building and improving the systems behind business web applications — REST APIs, databases, and server-side logic.

Deep experience in Python and PHP across fleet management, travel booking, agri-commodity trading, and enterprise loyalty. Known for taking over aging codebases and making them fast and maintainable: migrated legacy PHP services to FastAPI, sped up heavily used endpoints through query tuning and Redis caching, and designed MySQL architectures that hold up under real-time analytics load. Comfortable owning a system end to end in a small Agile team — from schema design to production stability.

Legacy → FastAPI
moved production PHP services onto a modern Python stack

Built from scratch
a full fleet management and accounting platform, schema to reporting

Four industries
fleet, travel booking, agri-trade, and enterprise loyalty

EXPERIENCE

Feb 2022 – Sep 2026
Pune

Senior Software Engineer

ImmplyCloud India Pvt. Ltd. — cloud technology solutions · Annex Cloud loyalty platform

- Designed and built scalable backend services using Python (FastAPI) and PHP.
- Migrated legacy PHP modules to FastAPI services, improving maintainability and API response times.
- Built and optimized REST APIs for loyalty, rewards, campaigns, coupons and customer engagement workflows.
- Applied Redis caching and SQL query optimization to cut response times on the busiest endpoints.
- Refactored fragile legacy modules, reducing production incidents and stabilizing releases.
- Containerized backend services with Docker and deployed them on AWS.

Sep 2021 – Jan 2022
Pune

Senior Software Engineer

SMSIPL (StartMySafari Innovations Pvt. Ltd.) — travel & safari booking

- Led backend development of booking modules using PHP, MySQL, and REST APIs.
- Implemented and documented API endpoints consumed by web and mobile clients.

Jan 2019 – Sep 2021
Pune

Senior Software Engineer

Fleetain LLP — fleet management software

- Built a complete fleet management and accounting system from the ground up using PHP (CodeIgniter), MySQL and JavaScript.
- Developed cost-per-kilometer tracking, maintenance scheduling, and parts lifecycle modules.
- Owned the MySQL architecture supporting real-time fleet analytics.
- Developed REST APIs and backend services for vehicle, maintenance, inventory, and fleet management operations.

Sep 2017 – Dec 2018
Pune

Software Developer

NSquare Xperts LLP — agriculture supply chain

- Contributed to Trade For Sure, delivering market pricing data to agricultural businesses.
- Developed REST APIs and integrated backend services for agricultural trading operations.
- Designed database schemas and backend logic for order management.

Dec 2015 – Aug 2017
Pune

Software Developer

Syneotek Software Solutions — client web applications

- Developed and maintained multiple client-facing web applications in PHP and MySQL.
- Participated in code reviews and managed version control with Git.
- Developed and integrated REST APIs for client web applications and third-party service integrations.

SKILLS

LANGUAGES	Python, PHP, JavaScript, SQL, HTML, CSS
FRAMEWORKS	FastAPI, Pydantic, SQLAlchemy, Celery, Laravel, CodeIgniter
DATABASES	MySQL, PostgreSQL, Redis
WEB	REST APIs, AJAX, JSON, jQuery, Bootstrap
CLOUD & DEVOPS	AWS, Docker, CI/CD
TOOLS	Git, Bitbucket, SVN, Jira
ARCHITECTURE	System design, API design, performance optimization
PRACTICES	Backend architecture, database optimization, legacy migration, code review, Agile & Scrum

SELECTED PROJECTS

Loyalty

Annex Cloud — Enterprise Loyalty Platform annexcloud.com

Tech: Python, FastAPI, Celery, PHP, MySQL, Redis, Docker, AWS

- Developed loyalty and receipt-scanning modules for enterprise clients to support reward-based customer engagement.
- Implemented campaigns, customer segmentation, rewards, coupons, and tier systems with configurable business rules.
- Built and maintained REST APIs for loyalty, rewards, campaigns, and customer engagement workflows.
- Implemented automated cron jobs and Celery background tasks for high-volume data processing and scheduled operations.

Fleetain

Fleetain & Accounting Software fleetain.com · accountain.fleetain.com

Tech: PHP, CodeIgniter, MySQL, REST APIs, JavaScript, jQuery, HTML, CSS

- Built a fleet management platform for transportation companies to manage vehicles, drivers, and fleet operations.
- Developed vehicle maintenance, complaints, inspections, work orders, and workshop activity modules.
- Implemented spare parts, inventory, fuel consumption, and maintenance cost tracking.
- Designed UIN-based (Unique Identification Number) tracking of vehicle parts throughout their lifecycle to reduce breakdowns.

Agritech

Trade For Sure (Mandi Central App) tradeforsure.com

Tech: PHP, Laravel, CodeIgniter, MySQL, REST APIs, JavaScript, jQuery, HTML, CSS

- Built a live agricultural trading platform that digitizes mandi (market) operations, covering commodities, traders, buyers, sellers, and transactions.
- Delivered live commodity prices and market information to traders and farmers across India.
- Developed and maintained REST APIs for trading, market data, and business operations.

EDUCATION & ADDITIONAL INFORMATION

2011 – 2014
Aurangabad

Bachelor of Science (Computer Science)

Dr. Babasaheb Ambedkar Marathwada University (BAMU)

LANGUAGES	English, Hindi, Marathi
AVAILABILITY	Immediate joiner
